

Mathematics

In Maths this term we will work on building our confidence in counting to and across 100 (forwards and backwards). We will practise reading and writing numbers to 20 in numbers and words. We will also count in multiples of 2, 5 and 10. We will identify numbers that are 1 more or 1 less than a given number (and extend this to 2,3,4 etc more or less than a given number). We will add and subtract one and two digit numbers to 20 and recognise and name 2D and 3D shapes

Home learning ideas: To practise recalling number bonds to 10 (and once confident in these, to learn number bonds to 20)

Physical Education

Our PE this term will be on Wednesdays and Fridays. We will: explore and use apparatus in a variety of ways; link, adapt and perform movements with confidence & control and respond imaginatively to a range of stimuli.

Science – Animals including Humans

For our science topic this term, the children will be identifying, labelling and drawing the basic parts of the human body. We will be looking at our senses and learn more about how our senses work and what we use each sense for.

Seasons

We will begin to look at our science topic about the seasons and discuss what we see in the Autumn months.

Religious Education – Our Special World

In Religious Education this term we will be learning how Christians believe that God created the world and all the things in it. We will be writing prayers, taking into consideration what we could thank God for. We will also be looking at how Christians believe we should look after God's creation and thinking of ways to help make the world a better place.

All about me

Creative Curriculum

This term, we will begin by drawing self portraits, looking carefully at the details and different features that make us unique. We will also discuss healthy eating and get creative making jelly!

SMSC

Whilst learning about senses and the human body, we will also be discussing how people who are deaf and blind communicate and live their lives—we will learn some sign language and look at Braille! We will also consider why some people we see do not have all of their body parts and look at how they continue to live normal lives.

British Values

We will focus on the rule of law this term. We will create our own class rules to follow and understand the importance of following them. We will also look at strategies for resolving conflicts effectively.

English

Our English will be linked to our topics of ourselves, our senses and toys from the past. We will focus on: ensuring our writing is constructed correctly using capital letters at the beginning of sentences and for names, including full stops and finger spaces. We will continue to ensure we use phonic sounds in our writing to segment words we are unsure of (if any parents or carers would like a phonics mat at home to help your child with their writing then please ask Miss Hutchings). We will also be writing our letters in the correct formation through lots of handwriting practice. For phonics, we will revise and reinforce sounds learnt in Reception and look at alternative graphemes.

Topic – Toys from the past

In History, we will be looking at toys our parents and grandparents used to play with and comparing them to the toys we have today, thinking about how they have changed. We will be looking at time lines, placing toys in chronological order and also designing a toy for the future. If any parents or grandparents have old toys or photographs of old toys we could look at in class, we would love to see them!

Music

This term, we will be learning a variety of songs and using percussion instruments to accompany the songs.

Italian

We are very excited to have Mrs Ward, our specialist Italian teacher with us to continue our fun Italian lessons. We will practise recalling numbers from 1-10, the colours of the rainbow and some parts of the body.
