

17th March 2017

Dear Parents,

This week in maths the children have been learning how to use the inverse operation for each operation. This helped them to move on and solve missing number problems. We will continue with this next week. They showed me that they have great written methods for multiplication this week and could use them to develop their understanding.

We continued with poetry at the beginning of the week, learning what makes a good limerick. The children came up with some funny ideas and had a good understanding of rhyme and rhythm. Later on in the week, we began to plan writing a newspaper report. The children interviewed some characters, such as Thomas Farrinor and Samuel Pepys, for their journalist notepads.

With Mrs Cannon, the children completed beautiful 3D collages of 'The Great Fire' and after our DT morning making Tudor houses, we will move onto beginning our lanterns. It would be great if the children could have their empty and clean jars in school for Tuesday please.

In PE we have been learning skills from tag rugby and will continue to develop these, whilst the weather allows us outside. Could you please check your child has trainers or plimsolls that fit, as we have had a few complaints about shoes hurting this week?

Kind regards,

Mrs Wardle and Mrs Patterson
