

21st October 2016

Dear Parents,

In maths this week the children have been looking at positional and directional language. They have been using compass points and their knowledge of 'clockwise and anti-clockwise' to find treasure on a grid. They began to look at coordinates in Computing.

The children were learning to give more 'specific' instructions in English this week and understand that we need to use imperative verbs and time connectives to help us do this. They gave clear instructions to an alien on how to clean his teeth. They then even went on to writing instructions on how to turn their teacher into a toad. As you can imagine, this was the activity they enjoyed the most!

It was great to see so many parents at our class Act of Worship. We were very short on children and had to make quite a few last minute changes due to sickness and holidays so we hope that you enjoyed it.

I will be sending out information about the 'run a mile' event after the holidays as we are still finalising the date for this.

I have set some online maths homework which is a booster for the 2, 5 and 10 times tables. The children have also been given a homework book to use to write about anything they may do over the holidays. This is to keep them writing and to help them remember all of the important elements that make a great sentence.

Enjoy the holidays,

Mrs Wardle and Mrs Patterson
