

Year 6 letter

Dear Parents,

This has been a rather chaotic week, with many children out at various times visiting schools. However, our work has continued! In maths, we have mostly spent time finding percentages of amounts and solving percentage problems, although today we have looked at the names and properties of 3D shapes. In English, the children wrote a detailed set of instructions, completed a reading comprehension and began to write a biography of Anne Frank. In science, the children carried out an investigation to discover what happens to shadows, as objects are moved closer or further away from a light source and in history we found out about the evacuation of children during WW2.

Teacher of the Week

Amy was an excellent 'Teacher of the Week' and her lesson was titled 'Fun with Flags.' She was very knowledgeable, made her lesson interesting and engaging and controlled the class very well!

Home Learning

The children should complete the following pieces of home learning over half-term:

- Air raid shelter project
- Food diary (ready for our next history lesson about rationing during the war)
- Learn spellings
- Read regularly
- Practise times tables

It would also be a great idea if the children went onto MyMaths and played any of the games which are intended for children in Years 5 and 6.

I hope you all have an enjoyable and restful week,

Best wishes,

Louise Grinstead
