

Year 6 letter

Dear Parents,

I hope everyone had a really lovely Easter holiday. The children now have a challenging few weeks ahead, with final preparations for the SATs, which take place in the week beginning Monday 8th May.

In the four days of this week we went through the holiday home learning, which wasn't quite as much as I had intended, since I had pressed the wrong button on the photocopier! In addition to this, we worked on finding missing angles, finding the volume of cuboids and calculation skills in Maths. In English, we practised our SPaG, went through a reading comprehension and began a long piece of narrative writing based on a film clip called 'Girl and Robot'. A new science topic was started on 'Evolution and Inheritance' and Geography work now has a focus on our local environment. Mrs Bowie would be very interested to hear if there are any parents, grandparents or friends who have lived in Leybourne for a long time, who would be happy to come into school to talk to the children about any changes in the local area that they have experienced.

Teacher of the Week

This week, Jake taught the class about climate change and extreme weather. His lesson was very informative and we particularly enjoyed his scientific demonstrations, as he made snow and a tornado in a bottle. He finished with a fun memory game.

Home learning

This weekend I would like the children to complete a maths sheet, revising Roman numerals and finding missing angles. I would like it returned on Monday please.

Best wishes,

Louise Grinstead
