

Year 6 letter

Dear Parents,

This week in maths, we have solved lots of addition and subtraction problems involving decimals and we have practised the short multiplication method for whole numbers and decimals. English work has included writing a letter and a detailed, descriptive narrative of an air raid. In RE we learnt about the teachings of Guru Nanak and in science we put all those shoe boxes to good use, investigating whether or not we need light to see.

Our Paralympics Day on Wednesday was a real success. The children were mixed up into groups with children from every class and they did a great variety of activities with each of the Key Stage 2 teachers. Lots of fun was had and valuable lessons were learnt about disability and British Values.

We hope you enjoyed our class Act of Worship on Thursday. It was great to have so many parents there supporting us.

Teacher of the Week

Keira was our first 'Teacher of the Week'. She taught everyone all about Dachshunds and we took part in a quiz.

Home Learning

All children have a maths sheet to practise short multiplication, which should be completed and returned on Monday. New spellings have been set for Thursday - I was impressed with how well most children learnt last week's words. Some children also have a handwriting sheet to complete by next Friday.

Best wishes,

Louise Grinstead
