

Year 6 letter

Dear Parents,

I have given the children a pretty tough first week back, with lots of assessments to enable me to judge where they are at the moment with their learning. They completed three maths tests (one arithmetic and two reasoning), a reading comprehension and a SPaG test. In addition to this, the children independently wrote a letter home from a WW2 evacuee. Towards the end of the week, we have focused on simplifying fractions and finding equivalent fractions. We have also found out about the early life of Anne Frank, in preparation for writing a biography about her. In Science, the children independently planned and carried out an investigation to discover which materials are the most reflective. I was really impressed with the scientific thinking demonstrated.

Teacher of the Week

This week's teacher was Amber. She taught the class about horses and ponies really well and the children certainly enjoyed her colouring competition.

Home Learning

The children have an equivalent fractions sheet to complete by next Wednesday. I would also like them to find out ten fascinating facts about Anne Frank by next Tuesday.

Best wishes,

Louise Grinstead

All the children made a fantastic effort with their shelters home learning. Here are just a few examples:
