Year 6 letter

Dear Parents,

This week in English, the children wrote a diary entry and a newspaper report, as well as doing lots of SPaG activities. In maths, we finally cracked long division, worked on ordering numbers, solved many word problems and completed an activity involving negative numbers. The children completed a map in history to show the occupation of European countries by Germany in 1939 and 1940. This class are proving to be great scientists and this week an investigation was carried out to discover what happens to a shadow, as an object gets further and further away from a light source.

Teacher of the Week

Yet again, this week's teacher did a terrific job. Mara showed that she is a natural teacher and gave a great presentation about sharks. She asked lots of questions and kept the class under control! Her presentation included a really well organised quiz and the biscuits that she had made for prizes went down very well indeed!

Home Learning

The children completed a tables challenge in school yesterday and results were pretty pleasing, so thank you for supporting your child with last week's home learning. Now we need to work on learning spellings a bit better, as test results have been a bit disappointing so far. This week's home learning practises parenthesis - adding extra information to sentences by using brackets, dashes or commas. The completed sheets should be returned to school by next Friday please.

Best wishes,

Louise Grinstead
