

13th November 2020

Year 5 Letter

Dear Parents

This week in maths, the children have been busy learning about square numbers and cube numbers and how to multiply by 10, 100 and 1000. In English, the children enjoyed writing the stories that they had planned about Bottom's dream. We have started a new class book called "Varjak Paw" by SF Said. This week, the children have written a discussion text and a descriptive recount based on the parts of the story that we have read so far. In history, the children found out about the Mary Rose and the artefacts discovered on it. In science, the children planned and carried out their own investigations, to test how different variables affect how well sugar dissolves.

Teacher of the Week

This week's teacher was Tilly and she was fantastic! Dressed in her Scout uniform, she told the class all about Scouts with great confidence. She then provided the children with the equipment they needed to make a raft. Today, in Woodland learning, the children tested out how well the rafts floated in the stream - it was great fun!

Many thanks to Luke's, Ella L's, Maisie's and Will's mothers for helping out at Woodland learning - your support is greatly appreciated.

Remembrance Day

On Wednesday 11th November, the Year 5 and Year 6 children gathered around the war memorial to honour the two minutes silence for Armistice Day. The children were incredibly still and respectful and it felt quite special.

Home learning

As usual, the children need to read daily, learn their spellings for Friday's test and practise their times tables. In addition to this, they have a maths sheet to complete, to practise square and cube numbers. I would like it returned by Thursday 19th November please.

Best wishes,

Louise Grinstead
